

STREAMLINED SHOWERING

All shower elements have distinct advantages for planner, plumber and service provider alike:

- Housing width 250 mm – covers existing fitting connections
- Saves time on installation
- Easy to service – inspection possible without time-consuming disassembly
- Facilitates drinking-water hygiene

Product advantages of the Kuhfuss Sanitär Shower System

- Ready for WRC technology with dialog-ability thanks to the integrated Q-Chip
- Legionella prevention ensured thanks to a programmable hygiene rinse and low-aerosol shower head, used in combination with piezo technology
- User-friendly thanks to the start/stop function and adjustable running time, used in combination with piezo technology
- Responsive thanks to a 12V fixed current connection or 6V battery compartment used in combination with piezo technology
- Upgrade possible for bypass solenoid valve for thermal disinfection using keyswitch or BMS in the case of thermostat models with piezo technology
- Robust thanks to a thermostat knob with brass stop ring (no plastic)
- Easy to clean thanks to its rounded shape and easy-care, joint-free surface
- Easy to install thanks to an installation rail system (1x hold, 4x mark, 4x drill)
- Easy to inspect and maintain thanks to a practical folding cover

Ready to go: rail system with marking for fast installation

Inspection possible without disassembly of the pipes thanks to a folding cover

Legionella prevention: Low-aerosol water jet thanks to the AeroStop shower head

Practical: includes integrated soap dish

In the case of the WRC-technology-ready fitting with integrated Q-Chip, a dialog box establishes the connection to the WRC functional module. Interactive user guidance on laptop/PC.
